

Siniat set

Createx jointing compound

Siniat set is a plaster based cement specifically developed for filling joints in the **createx®** system. **Siniat set** is a setting cement providing a strong resistant joint. It has a consistent working time of 45 minutes with a 60 minute setting time.

mastalite or **mastaline** are recommended for finishing **createx®** joints after applying **Siniat set** for easy sanding and a smooth finish.

performance

Mixing

Mixes easily by hand or electric mixer to a smooth, creamy consistency.

Strength

Fast strength development.

Easy Application

Easy application due to its creamy consistency.

Low Shrinkage

Less re-filling required due to its low shrinkage properties.

key benefits

- mixes easily to a creamy consistency
- stabilised set
- high joint strength

product information

product size	10 kg paper bag
type	Plaster based jointing compound
mixing ratio	1L of water to 2kg of Siniat set
working time	45 minutes
setting time	60 minutes
system usage	✓ createx® system

application

- Jointing must not be conducted until all ceiling services and access panels are installed in the ceiling, otherwise the excessive vibration may cause joint cracking or peaking.
- Use a wet brush to clean dust from joints after fixing the boards.
- Prime site cut edges with a PVA based primer (ie: one part of Bondcrete to four parts water). For improved jointing compound adhesion, factory V edge joints can also be primed.
- Pour the required amount of clean tap water into a container. Add the powder into water, mixing continuously to a smooth, thick consistency. Soaking is not recommended.
- Only mix enough jointing compound to be used in 45 minutes and do not contaminate with previously mixed batches. Once the material starts to set it cannot be remixed.
- Slightly overfill joints with **Siniat set** jointing compound and allow to dry. It is recommended to use a sausage caulking gun.
- After allowing to dry (approximately 1 hour depending on weather conditions), scrape off excess jointing compound to level the joint.
- Use **mastalite**, **mastaglide**, or **mastaline** for finishing joints and screw heads. Sand if necessary.
- Do not obstruct perforations during jointing.

optimise product performance by:

- Storing in a dry, well ventilated environment fully protected from the weather.
- Washing tools before product dries and hardens.
- Ensuring **Siniat set** does not dry out before setting has taken place under severe hot dry conditions.

Quality
ISO 9001

The management systems at our manufacturing plants are certified to ISO 9001 for quality management systems, ISO 14001 certification for environmental management systems and ISO 45001 certification for health & safety management systems.

The following Siniat products have been independently certified by Global GreenTag to GreenRate Level A: **mastashield**, **fireshield**, **fireshield h**, **soundshield**, **watershield**, **spanshield**, **multishield**, **curveshield**, **opal**, **trurock** and **trurock hd**. Compliance certificates are available on siniat.com.au.

opt2act

A wide range of Siniat plasterboard and metal products are available under the Opt2Act carbon neutral program to help you achieve your sustainability goals. Visit siniat.com.au to find out more.
