

metal framing systems

Siniat designs and manufactures a comprehensive range of metal framing components for wall and ceiling systems.

Manufactured in Beenleigh Plant, the components are designed in accordance with relevant Australian Standards and the requirements of the Building Code of Australia.

Siniat Metal Framing Systems include steel stud wall systems, furring channel and batten wall systems, top hat and facade systems, jamb stud, acoustic studs, concealed and exposed ceiling systems together with a range of access panels and plaster finishing accessories.

Steel coils in Siniat products comply with AS 1397: 2011 *Continuous hotdip metallic coated steel sheet and strip - Coatings of zinc and zinc alloyed with aluminium and magnesium*. The steel coils also comply with AS/NZS 1365:1996 *Tolerances for flat-rolled steel products*.

Siniat Metal Framing Systems are non-combustible, versatile and durable products suitable for use in internal and external wall and ceiling applications inside the building envelope.

Siniat system components are available in multiple widths, lengths and gauges - from stud and track, deflection head track, nogging track through to the innovative flexible track.

key benefits

- wide range of metal wall and ceiling components in various profiles and thicknesses to meet project requirements
- industry leading corrosion resistance engineered to handle the harsh Australian climate
- part of the complete system from Siniat including plasterboard, insulation and compounds

carbon neutral opt-in program

Siniat is focussed on reducing our carbon footprint. As part of this commitment, Siniat offers an opt-in carbon offset program certified against the Australian Government's National Carbon Offset Standard (NCOS). Customers may choose to offset the carbon emissions associated with manufacturing the metal products they are purchasing. The opt-in program is available for a range of metal products manufactured in Beenleigh Plant.

storage and handlings

- Products are supplied in varied pack and sub-pack quantities. Product must be secured to prevent movement during storage and transport.
- Store all steel profiles and associated accessories including trims, beads and clips in a dry area free from excess dirt, oil and airborne contaminants such as acid and salt spray.

health and safety

- Products manufactured by Siniat metal are produced from zinc/aluminium/magnesium or galvanised (zinc) coated steel coil which is classified as a non-hazardous material.
- Wear appropriate gloves to avoid cuts when handling. Other PPE as appropriate should be used based on the task (such as goggles when cutting sections). Any PPE used is to be compliant with the relevant Australian Standard.
- Persons with sensitive skin conditions should seek medical advice before prolonged handling of metal products.
- After handling steel, hands should be washed before eating and for personal hygiene.

product information

product	steel grade	corrosion coating
stud, track, nogging track, top cross rail and top hats	G300	Zincalume® 'Next Generation' AM125 and AM150
battens and furring channels	G550	
plaster trims	G300	
jamb stud	G450	Galvanized coating - Z350

design service

Siniat provides a free design service for metal products backed up by a Siniat Warranty.

The detailed engineering designs for walls, ceilings and window or door openings can take into consideration specific project needs, as well as designing to meet the building code requirements.

technical literature

- Siniat's Blueprint technical manual has a comprehensive range of pre-engineered span tables for our metal profiles used in our light-weight wall and ceiling systems. These span tables are all designed in accordance with AS/NZS 4600 Cold Formed Steel Structures and backed by the Siniat Warranty.
- Other technical literature is available in hard copy or in the form of downloadable PDF files from siniat.com.au.

The following Siniat products have been independently certified by Global GreenTag to GreenRate Level A: **mastashield**, **fireshield**, **impactshield**, **soundshield**, **watershield**, **spanshield**, **multishield**, **curveshield**, **opal**, **trurock**, **trurock hd**, **shaftliner** and **intershield**. Compliance certificates are available on siniat.com.au.

Quality
ISO 9001

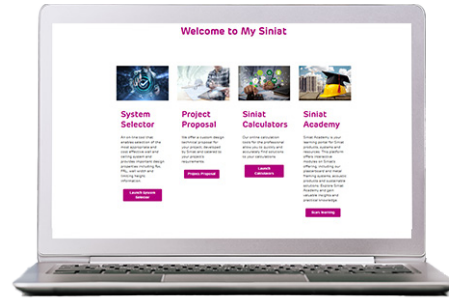

All Siniat products have been developed to meet the specific needs of the Australian market.

All Siniat Australian manufacturing sites comply with AS/NZ ISO 9001.

A wide range of plasterboard and metal products are available under the Opt2Act carbon neutral program. Opted-in products are certified carbon neutral by Climate Active. Visit www.siniat.com.au/opt2act to find out more.

Register for My Siniat!

My Siniat is an online technical hub where you can access everything you need for a compliant and successful project. It is your all-in-one digital platform for specifying, planning, and managing your Siniat wall and ceiling systems.

By registering for this platform, you will gain exclusive access to technical content, including System Selector, Project Proposal and the Siniat BIM and CAD Library.

You will also gain access to the **Siniat Academy** - a valuable training portal that provides a range of courses to learn more about our products and their applications. Courses are delivered in a fun and interactive way, and a certificate of completion is provided at the end of each module.
